Project CL-BVET: Education and Training for Collaborative Learning in Blended Learning Environments

Through professional training of educational staff, up-to-date educational and professional programmes and implementation in blended learning environments, we encourage and support innovation, development and use of digital production technologies among students, teachers and adults with the aim of accelerating economic and general development in partner countries.

PROJECT NUMBER: 10118330 - CL-BVET

PROJECT FINANCED BY program ERASMUS-EDU-2024-CB-VET - Capacity building in the field of Vocational education and training (VET).

THE PROJECT LASTS: 36 months; from 1. 1. 2025 to 31. 12. 2027

PROJECT GOALS

- Developing collaborative learning programs in blended environments with Open Badge.
- Setting up a portal for implementing collaborative learning programs in blended learning environments and issuing the Open Badge.
- Management and implementation of industrial programmable logic controllers (PLC).
- Increasing the capacity of VET providers and VET teachers and leaders.
- Piloting and establishment of sustainable cooperation.
- The double transition of green and digital.

FIRST PARTNERSHIP MEETING OF THE PROJECT AND PLA1

On 21 and 22 January 2025, the Šolski center Novo mesto hosted the first working meeting of the project partners of the CL-BVET and PLA1 (peer-learning-activity) project partners.

The meeting was attended by all representatives of all the seven project partners from four countries. The meeting was conducted in a combined mod; live and Zoom.

We are pleased to have met each other and look forward to further cooperation.

To share experiences and knowledge on collaborative learning, partners will organise a series of transnational and national **peer learning activities (PLA)** involving teachers, head teachers, experts and policy makers in VET.

CL-BVET PROJECT PRESENTED AT INTERNATIONAL CONFERENCE

On 14 March 2025, the international SkillMe 2025 conference took place in Udine (Italy). We presented the CL-BVET project and the paper Involvement of employers in design and delivery of VET, which was presented by a representative of the project partner Tehnička škola Gradiška.

The conference was attended by a large number of students, in addition to the professional public, speakers and paper presenters. We are pleased to have presented the CL-BVET project to 150 participants from Italy, Slovenia, Bosnia and Herzegovina, Austria and Croatia.

NATIONAL EVENTS POST PLA1

The national events held in February and March 2025 discussed and shared knowledge and experiences in education and training for collaborative learning in blended learning environments in the country.

A total of 118 experts from secondary vocational schools, educational institutions, universities, ministries of education and labour, agencies, companies, qualifications and quality institutions for vocational education participated in national post PLA1 events in the four partner countries.

Based on the findings, we will prepare a national analysis of the competences needed for collaborative learning by teachers and other VET providers.

The analysis will outline which competences need to be acquired or improved, and will draw up a set of competences that are the most important and necessary for collaborative learning.

All information and news related to the project can be found at
