CL-BVET project: Education and training for collaborative learning in blended learning environments

In the summary of the project, we wrote: "The development of automation in companies requires modern vocational education, which enables the implementation of programs for the acquisition of competencies. In all partner countries, we will analyse the competence needs of teachers for collaborative learning in blended learning environments. We will establish a platform where we will publish and exchange existing and new short programs for the acquisition of new competencies"; **we are successfully implementing this and much more...**

PROJECT NUMBER: **10118330 - CL-BVET**

PROJECT FUNDED BY: EACEA from the ERASMUS-EDU-2024-CB-VET programme - Capacity building in the field of Vocational education and training (VET).

PROJECT DURATION: 36 months; from 1.1.2025 to 31.12.2027

Achieved project objectives in the first year of implementation:

1. A complete mechanism and strategic documents for the implementation of the Partnership **Agreement, Project Management Guidelines, Quality Management Plan, Project Dissemination Strategy have been established.**
2. We have designed a comprehensive recognizable image of the project and set up a project website <https://www.cl-bvet.eu/> and a Facebook profile <https://www.facebook.com/clbvet/>
3. We have successfully carried out two project meetings of all partners (Novo mesto and Velika Gorica), where we have successfully carried out two mutual learning workshops PLA1 and PLA2. Both workshops were then carried out at the national level at all partners – **a total of 11 workshops attended by 231 participants** (significantly more than the announced result).
4. On this basis, we made 4 national and joint analyses "**Competences for collaborative learning in blended learning environments, preparation of training programmes and delivery of training**".
5. At the workshops of the working groups, we created a national and joint "**Set of competencies that are most important and necessary for cooperative learning**".
6. As part of the project, we have obtained a license for the issuance of digital microdoses for the "**Open Badge**" education and training. At the on-line workshop, we presented to all partners the operation and possibilities of using the portal and an example of how to create a training program that leads to Open Badge.
7. At working group workshops and a joint online meeting, we have created a "**Common Curriculum for the Open Badge Cooperative Learning Education Program**", which will be the basis for all our programs.
8. On this basis, all partners are now **developing training programs** that will be implemented in the project.

SECOND PARTNERSHIP MEETING OF THE PROJECT AND PLA2

On 1st and 2nd July 2025 at the Secondary Vocational School Velika Gorica, in Velika Gorica, Croatia, we held the second working meeting of the project partners of the CL-BVET and PLA2 (peer-learning-activity) projects. The working meeting was attended by representatives of all seven project partners from four countries.

Velika Gorica (CRO), 1.7.2025 – 2nd Partnership Meeting (SSSVG)

We presented the project – the implementation of activities, progress, achievement of goals, results, effects. At the PLA2 partners workshop, they exchanged experiences and learned about the development of competence programmes for collaborative learning in blended learning environments in EU partner countries and third countries. The workshop also presented the "OPEN BADGE FACTORY" platform, which will enable the digital issuance of certificates to participants who will successfully complete the training programs in the project.

As part of the partnership meeting, we also visited the Secondary Vocational School Velika Gorica and the Regional Center of Competence – INDUSTRY 4.0 (RCK Velika Gorica)

Velika Gorica (CRO), 2.7.2025 – PLA 2 (RCK Velika Gorica)

POST PLA2 NATIONAL EVENTS

On the basis of the PLA2 workshop "Education programmes for the acquisition of competences for collaborative learning", 4 national POST PLA2 workshops were conducted. All the national workshops had a very good turnout and achieved very good results, which were shown in the preparation of the set of competences needed for collaborative learning and the training programmes that we need.

Plevlja (MNE), 5.9.2025 – Post PLA2 MNE

Velika Gorica (CRO), 9.9.2025 – Post PLA2 CRO

Banja Luka (BIH), 9.9.2025 -Post PLA2 BIH

Novo mesto (SLO), 25.8.2025 – Post PLA2 SLO
